Art Unit: 2862

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1, 11, 14 and 15 are rejected under 35 U.S.C. 102<sup>e</sup>(~~6~~) as being clearly anticipated by Scott et al., since the preamble to claim 1 is considered only a statement of intended use and lends no patentable weight to the claim.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2-10, 12, 13 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Scott et al.

Art Unit: 2862

Scott discloses all of the claimed subject matter, except for the specific structural details of the wire, the nonmagnetic material and the adhesive <sup>layer</sup> ~~longer~~. These features are considered design considerations, well within the capabilities of one skilled in the art.

5. Claim 16 is rejected under 35 U.S.C. 103(a) as being unpatentable over Teruyoshi (JP 58-135954) in view of Scott et al.

Teruyoshi discloses all of the claimed subject matter, except for embedding the wire in nonmagnetic material. Scott teaches embedding a wire in a nonmagnetic mater as claimed. It would have been obvious to embed the wire of Teruyoshi as claimed in view the teaching of Scott.
